Jeana Payne is the Administrative Assistant for the public sector/state workplace unit of the Division of Industrial Safety and Health. She has been with the division for the last nine years and is the SHAPE program coordinator. Jeana also runs the division's safety video rental program.

Since joining KDOL, Jeana aided the development of the new amusement ride program. She also developed an inspection tracking program for the public sector unit. The new tracking system has heavily assisted the public sector unit in tripling the number of safety inspections conducted compared to the previous five years before 2013. She also digitized the entirety of the sectors records.

Prior to joining KDOL in 2013, Jeana served in the United States Air Force as an Air Transportation Specialist. She continued on to work within the pharmaceutical industry and attended Washburn and Rasmussen Universities.
