Mallory A. Jennings graduated with a Bachelor of Science in Mechanical Engineering from Wichita State University in 2010 and a Masters in Mechanical Engineering from Rice University in 2021.

She joined the NASA team as a cooperative education student during college in 2007. She transitioned to working in the Space Suit and Crew Survival Branch in 2008 and spent time as a co-op and a full-time engineer working various projects with the Portable Life Support System (PLSS) on the next generation space suit.

Mallory is now the System Manager at NASA Johnson Space Center for the Extravehicular Mobility Unit (EMU), which is the current space suit on the International Space Station (ISS).
