Mr. Leines has spent his career in the Environmental, Health and Safety (EHS) industry serving clients with managing a wide variety of EHS projects at industrial, commercial, state, and federal facilities throughout the United States.

He provides consulting and project management for his clients including regulatory compliance site and employee exposure assessments, training, and development of recommendations for the protection of employees and the environment.

Experience includes phase I & II environmental site assessments; underground storage tank removal projects; industrial hygiene services; asbestos/lead/fungal surveys and remedial oversight; hazardous material inventory, soil and groundwater remediation; CERCLIS (superfund) removal actions; building renovation and demolition projects; training and management.
