I am currently employed with Mallory Safety and Supply. My professional experience includes Procurement Manager, Logistics, Safety Engagement Leader, Safety Product Selling and trainings. I love to engage in positivity in workplace environments and show value of my real-life experiences professionally and personally when it comes to safety.

We all want our teams to go home safely and it's our job to be sure that we do everything we can to have the mindset that we can improve safety every day.

As for my personal background, wife for 28 years and mother of two children. I am a farm girl of a 4th generation farm and very proud of those roots. I own my own business and volunteer heavily with Veterans and anything involving kids to help them have a positive impact with an adult. I enjoy baking and spending time traveling.
