Jeana Payne is the Administrative Assistant for the public sector/state workplace unit of the Division of Industrial Safety and Health. She has been with the division for the last eight years and is the SHAPE program coordinator. Jeana also runs the division's safety video rental program.

Since joining the Department of Labor, Jeana aided the development of the new amusement ride program. She also developed an inspection tracking program for the public sector unit. The new tracking system has heavily assisted the public sector unit in tripling the number of safety inspections conducted compared to the previous five years before 2013.

Prior to joining the Department of Labor in 2013, Jeana served in the United States Air Force as an Air Transportation Specialist.
