Randy Wheeler graduated from Cleveland Chiropractic College in April 1986, and practiced in Kansas as a Chiropractor for 12 years. Randy then transitioned into the safety field and worked as a Safety Director/Trainer for the next 22 years.

Based upon his work in both the health care profession and safety profession, he recognized the correlation between behaviors and belief systems, and went back to school earning a Master's Degree in Christian Counseling.

Randy has based his safety management style on behavioral based modification and coaching. Working at all levels, from owners to laborers, Randy's focus is change their beliefs in the value of safe versus unsafe behaviors.

In November 2020, he was given the opportunity to pursue his passion of helping others become safer and joined Hutchinson Community College Safety Academy as a trainer.
