

Kansas Labor Market Data

Angela White
LMIS Director

What is Labor Market Information Services?

- LMIS is a statistical branch of KDOL – Collect, analyze, and report data to enhance economic well-being of Kansans
- Serve federal government, state agencies, educational institutions, employers, students, job-seekers, legislators, etc.
- Consists of 4 units:
 - Economic Analysis Unit
 - Employment and Wages Unit
 - Occupational Statistics Unit
 - Special Projects Unit

Where Can I Find LMIS Information Services?

Labor Market Information Services Data

Quarterly Census of Employment and Wages

- Average employment and establishment counts by area, industry or size class
- Average weekly and annual wages

Local Area Unemployment Statistics

- Civilian Labor Force
- Employment
- Unemployment
- Unemployment Rate

Census of Fatal Occupational Injuries

- Occupations with the largest number of worker fatal injuries
- Fatal occupational injuries by industry and occupation
- Fatal occupational injuries by location

Occupational Employment and Wage Statistics

- Annual & hourly wage estimates by occupation including the average, 10th, 25th, 50th (median), 75th, and 90th percentiles
- Employment estimates by occupation

Current Employment Statistics

- Nonfarm employment by industry
- Hours worked & earnings by industry

Occupational Safety and Health Statistics

- Injuries and illnesses by occupation
- Injuries and illnesses by event, nature, and part of body
- Distribution of injuries and illnesses by race and gender
- Median days away from work due to injuries and illnesses

Other Data and Publications

- High Demand Occupations
 - Typical education, work experience, and job training needed for entry
- 2-year and 10-year Outlook
 - Projected openings by occupation, including replacement needs and openings due to growth
- Kansas Economic Report
- Affirmative Action Report
- Disability Report
- Aggregated Advertised Jobs Data
- Interactive Data Dashboards
- Monthly newsletter (sign up for constant contact!) with special report highlighting LMIS data and products

[LMIS One-Stop Report \(ks.gov\)](https://ks.gov/lmis)

Occupational Employment and Wages (OEWS)

Employment and wage estimates for approximately 830 occupations based on a survey of Kansas business establishments (employers)

Sampled once every 3 years at most and usually sent to HR professionals

This program is the only comprehensive source of regularly produced occupational employment and wage rate information for States and the U.S. economy

Data are used:

- To establish the fixed employment weights for the Employment Cost Index
- In the calculation of occupational rates for the Survey of Occupational Injuries and Illnesses
- In administering the H1-B visa program administered by ETA's Foreign Labor Certification program
- By MedPAC in research to improve the calculation of Medicare reimbursement rates

Information on Safety Occupations

SOC for a Safety Consultant can fall into a few different codes depending on the industry they may be consulting in, skill/education level etc.

19-5011 Occupational Health and Safety Specialists - Review, evaluate, and analyze work environments and design programs and procedures to control, eliminate, and prevent disease or injury caused by chemical, physical, and biological agents or ergonomic factors. May conduct inspections and enforce adherence to laws and regulations governing the health and safety of individuals. May be employed in the public or private sector. Sample of reported job titles: Certified Industrial Hygienist (CIH); Chemical Hygiene Officer; Environmental Health and Safety Officer; Environmental, Health, and Safety Officer (EHS Officer); Industrial Hygienist; Industrial Hygienist Consultant; Safety Consultant; Safety Management Consultant; Safety Officer; Safety Specialist

19-5012 Occupational Health and Safety Technicians - Collect data on work environments for analysis by occupational health and safety specialists. Implement and conduct evaluation of programs designed to limit chemical, physical, biological, and ergonomic risks to workers. Sample of reported job titles: Advisory Industrial Hygienist, Certified Industrial Hygienist (CIH), Construction Safety Consultant, Health and Safety Technician, Industrial Hygiene Consultant, Industrial Hygiene Engineer, Industrial Hygienist, Safety Research Professional

17-2111 Health and Safety Engineers, Except Mining Safety Engineers and Inspectors - Promote worksite or product safety by applying knowledge of industrial processes, mechanics, chemistry, psychology, and industrial health and safety laws. Includes industrial product safety engineers. Sample of reported job titles: Health and Safety Specialist, Industrial Hygienist, Industrial Safety Engineer, Product Safety and Standards Engineer, Product Safety Consultant, Product Safety Engineer, Safety and Health Consultant, Safety Engineer, Service Loss Control Consultant, System Safety Engineer

17-2151 Mining and Geological Engineers, Including Mining Safety Engineers - Conduct subsurface surveys to identify the characteristics of potential land or mining development sites. May specify the ground support systems, processes, and equipment for safe, economical, and environmentally sound extraction or underground construction activities. May inspect areas for unsafe geological conditions, equipment, and working conditions. May design, implement, and coordinate mine safety programs. Sample of reported job titles: Mine Engineer, Mining Consultant, Mining Engineer, Planning Engineer, Project Engineer, Safety Engineer, Safety Representative

High Demand-High Wage Occupations

- High demand occupations are jobs expected to be in greatest demand by employers in Kansas
- The list considers three measures of labor demand: current job openings, projected job openings over the next two years, and projected job openings over the next ten years
- Occupations are considered high wage if the occupation has a median wage greater than the median wage for all occupations in the region
- High Demand data is also available by the Career Clusters designated by the Kansas State Department of Education (KSDE)

Kansas Safety Statistics

Survey of Occupational Injuries and Illnesses

- Provides statistics on work-related injuries and illnesses in Kansas.
- Statistics include the number and frequency of injuries and illnesses by industry.
- The survey, conducted in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics (BLS), is designed as a tool for promoting efforts to make Kansas workplaces safer and healthier.
- Each year, randomly selected Kansas business establishments participate in this survey.
 - Individuals that are self-employed, farms with fewer than 11 employees, private households and government agencies are not included in the survey.

Census of Fatal Occupational Injuries

- Provides information on the frequency of fatal injuries occurring in the workplace.
- Fatal injuries occurring in the private and public sectors, the military, the self-employed and certain volunteers are all counted.
- Cross-reference diverse data sources in order to identify and verify that fatality counts are as complete and accurate as possible.
- The program provides workplace fatality data by occupational, industrial, and demographic characteristics in addition to the manner in which the fatal injury occurred.
- The data helps safety and health policy analysts and researchers prevent fatal work injuries.

SOII vs OSHA

Survey of Occupational Injuries and Illnesses

- Purpose: Collects, analyzes, and disseminates statistical data on workplace injuries, illnesses, and fatalities. Used for statistical purposes only.
- Methodology: Uses surveys like the Survey of Occupational Injuries and Illnesses (SOII) to gather data from a representative sample of employers.
- Confidentiality: Ensures that information identifying specific establishments is never released and is used only for statistical purposes¹.

Occupational Safety and Health Administration

- Purpose: Enforces workplace safety and health regulations to ensure safe and healthy working conditions.
- Methodology: Conducts inspections and investigations and requires employers to report certain types of injuries and illnesses through the Injury Tracking Application (ITA).
- Enforcement: Has the authority to issue fines and penalties for non-compliance with safety regulations².

SOII

- Both private and public sectors are sampled. The private receives a mandatory request and the public receives a “please respond” request.
- SOII (Survey of Injuries and Illnesses) Injury reporting follows OSHA guidelines. In scope cases include work related injuries or illnesses requiring care beyond first aid
- SOII injury reporting collections excludes:
 - Work Related Fatalities
 - Self-employed workers
 - Workers on Farms with 10 or fewer employees
 - Private Household workers
 - Volunteers
 - Federal employees
- Sample size is approximately 3,500 per year
- Collection of SOII data is on a CY basis – All the companies required to submit their injury/illness data in 2025 were sent a prenotification in 2024 and advised to maintain their logs throughout 2024. This collection of 2024 data will then be submitted when the report request is sent to them in January of 2025.
- For all BLS SOII reporting employers can go to the following web address: <https://www.bls.gov/iif/>
- For all BLS CFOI reporting employers can go to the following web address: <https://www.bls.gov/iif/overview/cfoi.htm>

SOII Outputs

- Industry estimates published in SOII Annual Summary (available from 1972)
- Case estimates published in SOII Case & Demographics (available from 1992, and as biennial estimates starting with the 2021-2022 reference period.)
- The Injuries, Illness and Fatalities program publishes two broad categories of outputs based on information provided by employers. Since 1972 BLS has published summary estimates of the number and incidence rate of injuries and illnesses by industry. In 1992, BLS began publishing information on the detailed case circumstances and demographics of the injured or ill worker. These estimates historically covered only cases involving days away from work (DAFW) through 2020.
- For 2011-2019, estimates for detailed case circumstances and worker demographics for cases involving job transfer or work restriction (DJTR) were also available from a subset of industry subsectors covered in a pilot study. Beginning with reference year 2021, DJTR case details were collected across all industries, and BLS has published the first biennial estimates for both DAFW and DJTR for the two-year, 2021-2022 reference period (see below for additional details on DJTR collection and estimates). For more on workplace injuries and illnesses see our definitions page.

CFOI

Census of Fatal Occupational Injuries (CFOI)

- Purpose: The Census of Fatal Occupational Injuries (CFOI) provides comprehensive, accurate, and timely counts of fatal work injuries in the U.S.
- Data Collection: The CFOI uses multiple sources, such as death certificates, workers' compensation reports, and administrative reports, to identify and verify fatal worker injuries.
- Verification: To ensure accuracy, each case is substantiated with two or more independent sources.
- Usage: The data helps safety and health policy analysts and researchers prevent fatal work injuries.
- Employers can still benefit from the aggregated data and reports published by CFOI. These reports provide valuable insights into trends and patterns in workplace fatalities, which can help employers identify potential hazards and improve safety practices.

Frequently Asked Questions

- Is OSHA electronic reporting the same as the Survey of Occupational Injuries and Illnesses?
 - No. OSHA's Injury Tracking Application (ITA) is an electronic reporting requirement for establishments developed and maintained by OSHA. The SOII is a survey of establishments administered by BLS for statistical purposes. Some employers may be required to report to OSHA and may also be sampled for participation in the SOII. BLS has now implemented the ability for those employers who submitted data to OSHA to use their ITA number which will automatically populate the SOII survey for them.
- Can we submit data to only BLS or OSHA?
 - No. If you receive a mandatory survey from BLS and are required also to provide information to OSHA, you must submit it to both agencies.

Future Enhancements

Quarter 1 2025

Labor Market Information Services (LMIS)

Project Plan

Today's Occupations – Tomorrow's Opportunities (T.O.T.O.) Portal

- LMIS Career Exploration tools for 6th-12th
- Exposure to less commonly discussed occupations
- Resources for students, educators and parents
- Data-driven tools using KS data
- 2025 Q1 planned release

This plan will position Kansas students to make informed career choices, better aligning their skills with state labor market needs, ultimately driving workforce development and economic growth.

TODAY'S OCCUPATIONS, TOMORROW'S OPPORTUNITIES

Finding the right career can be challenging. Whether you are just getting started in your career exploration journey or you already know where you are headed, we've got several resources compiled in one convenient place that will put you on the road to success!

Objectives

- Replace Kansas Career Navigator:
 - Explore job opportunities and make smart choices about their education and training
- Support Kansas Department of Education (KSDE):
 - Help students find career paths that match their strengths and interests
 - Help schools to create quality pathways that prepare students for college and jobs using Kansas LMI data and resources
- Support Governor Kelly's "The Road Ahead" Plan:
 - Focus on education and training
 - Keep skilled workers in Kansas
 - Kansas data by region supports "Framework for Growth"

Objectives (cont.)

- **Increase Kansas Career Opportunities/Options**
 - Help students explore different jobs in high-demand and high-paying Kansas industries
 - Connect what students learn in school to real-world skills needed for Kansas jobs and higher education
 - Kansas USD's offer 36 Career Pathways covering all 16 Career Clusters
- **Facilitate Career Planning and Strengthen State Economy**
 - Use Kansas data and TOTO tools to plan for careers based on Kansas labor market information
 - Find jobs that are in high demand in Kansas, making it easier for people to stay and work in the state

Key Components

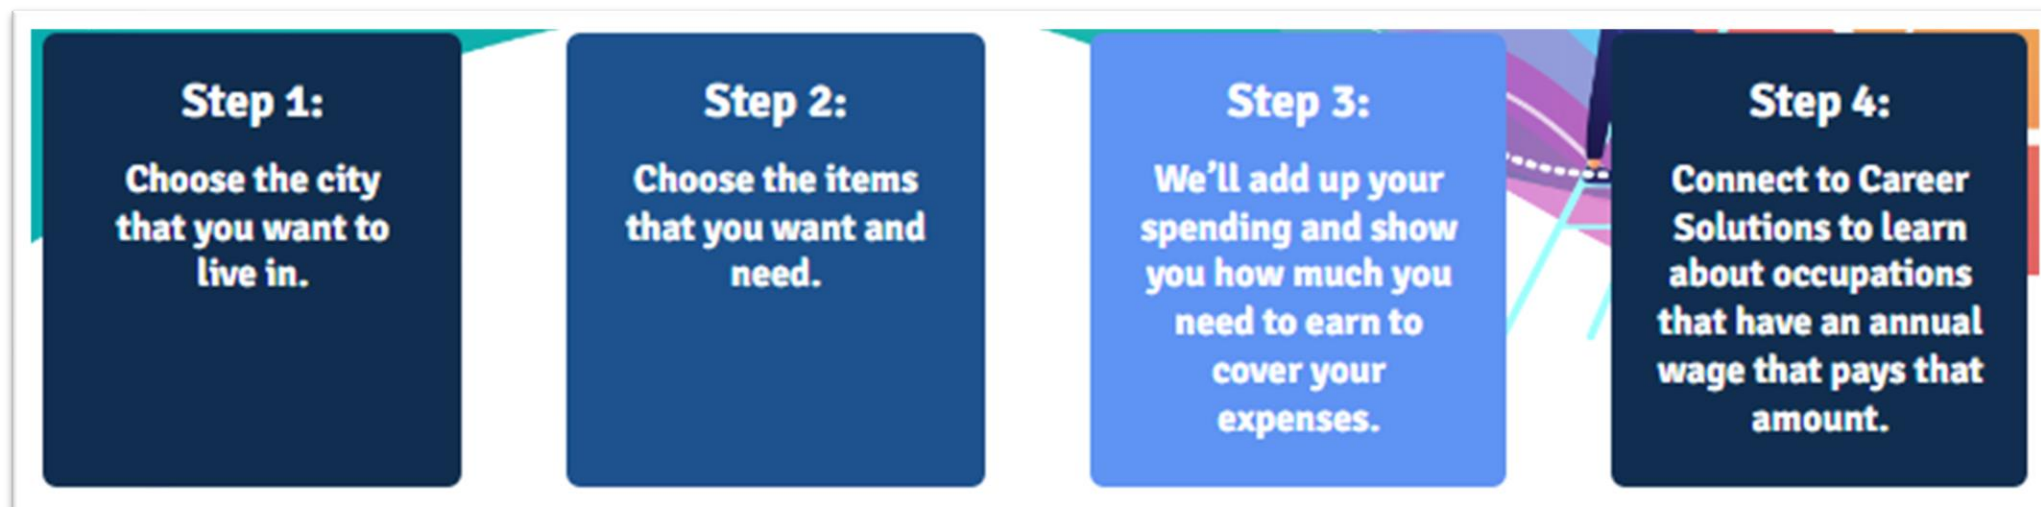

- T.O.T.O. Website is dedicated to Career Exploration and Planning
 - Primary target 6th - 12th grade students, educators, and parents
- Two main tools:
 - Wizard of Jobs – Road to Reality
 - Determine the income needed to support their desired lifestyle, aiding in career and job selection
 - Virtual Career Center
 - Students explore career interests, skills, and KSDE pathways and integrates labor market data to guide informed decision-making

Wizard of Jobs – Road to Reality Tool

Budget Tool:

- It's a practical tool for guiding students toward financial stability in their future career
- Designed to help students understand how much money they need to earn to afford their wants and needs, helping them make better choices when deciding on jobs and careers. Knowing how much money they need to earn is very important in making employment and career decisions that are right. Here's how it works:

Step 1:
Choose the city
that you want to
live in.

Step 1:
**Choose the city
that you want to
live in.**

Step 2:
**Choose the items
that you want and
need.**

Step 2:
**Choose the items
that you want and
need.**

Step 3:
We'll add up your spending and show you how much you need to earn to cover your expenses.

Step 3:
We'll add up your spending and show you how much you need to earn to cover your expenses.

Step 4:
Connect to Career Solutions to learn about occupations that have an annual wage that pays that amount.

Step 4:
Connect to Career Solutions to learn about occupations that have an annual wage that pays that amount.

HOUSING

Choose only one or enter your own amount.

FOOD

Choose only one or enter your own amount.

UTILITIES

Select as many as you like. Enter your own amounts or use defaults.

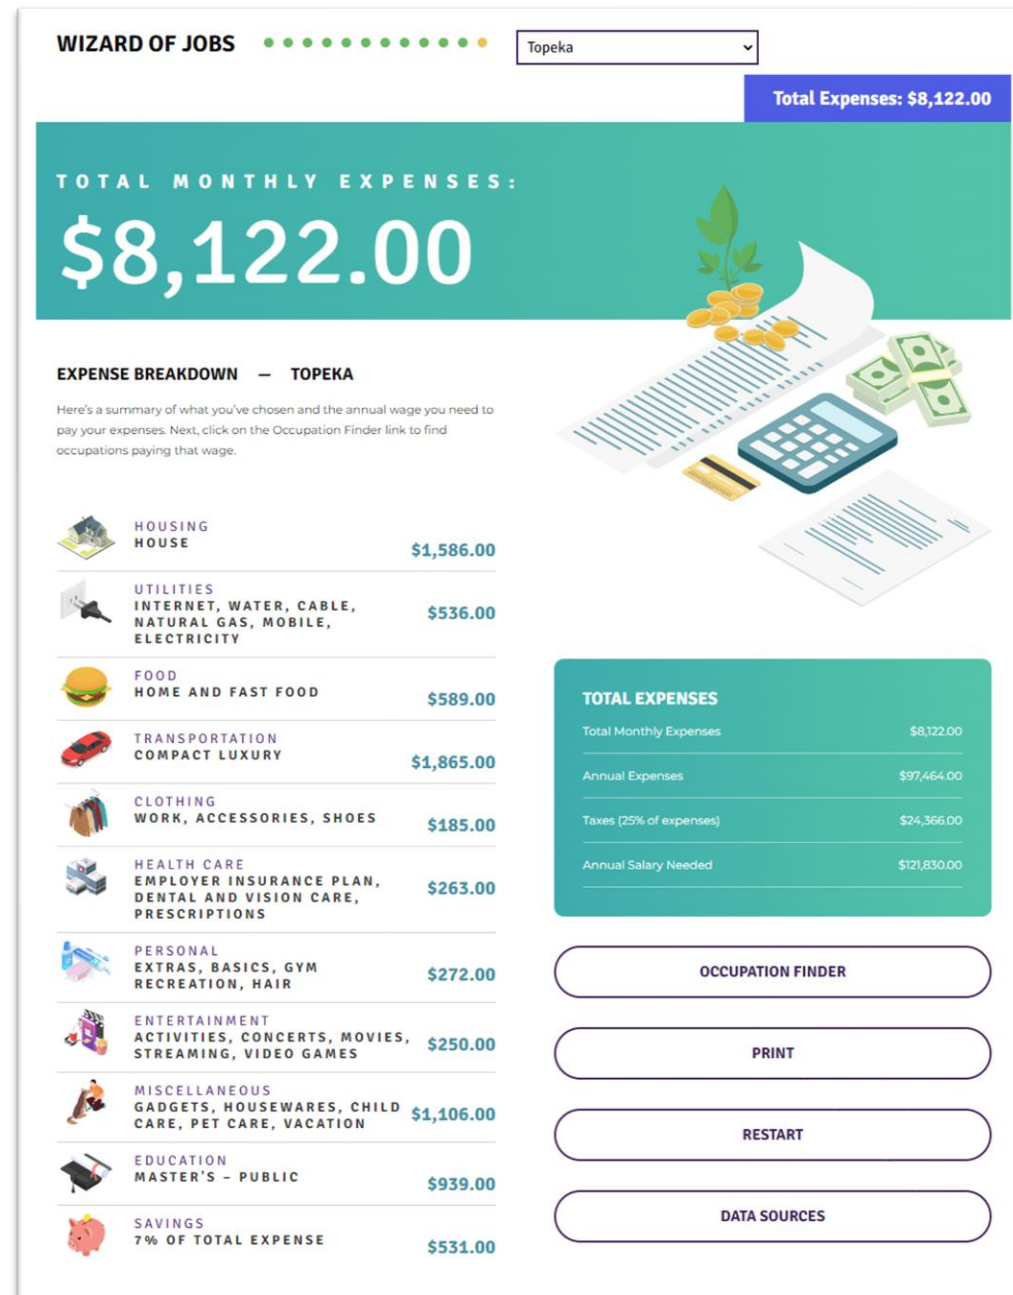

Categories:

- Housing
- Utilities
- Food
- Transportation
- Clothing
- Healthcare

Categories:

- Personal
- Entertainment
- Miscellaneous
- Education
- Savings

- Monthly expense summary of what was chosen and the annual wage you need to pay those expenses
- Change geography to see how the cost-of-living effects salary needs.

Key Components

Virtual Career Center

- Students explore career interests, skills, and pathways and integrates labor market data to guide informed decision-making

The screenshot displays the Virtual Career Center interface. On the left is a 'Filters' sidebar with a search bar and various filter categories. The main area shows 'Results 1016 of 1016' with sorting and pagination options. Two career profiles are visible: 'Accountants and Auditors' and 'Actors', each with a data table and a description.

T.O.T.O.
Today's Occupations, Tomorrow's Opportunities

The T.O.T.O. website will be an inclusive career coaching site that engages students early and often in career exploration and planning activities. T.O.T.O. will encourage discovery of interests and talents and help identify pathways and experiences that lead to real employment opportunities.

LABOR MARKET INFORMATION SERVICES

AUGUST 2024

**2022-2032
EMPLOYMENT PROJECTIONS**

Projections inform researchers and other interested parties about the future direction of the labor market and its implications for the economy. Projections also play an important role in making career choices. While general interest in certain careers may impact occupational choices, information about future trends in employment or demand for labor helps identify practical options to ensure future job security. Visit www.klic.ks.gov to learn more about employment projections.

Occupation	Job Numbers		Job Changes		Median Annual Wage
	Base Year 2022	Projection Year 2032	Numerical	Percent	
Total, All Occupations	1,497,553	1,546,959	49,406	3.3%	\$45,250
